

# Drawknives

---

Joonas Kärkkäinen 13.08.2020

**Sketch of my very first blade. Steel: Stenco Leuku / W.Nr 1.1750**

Making tang's

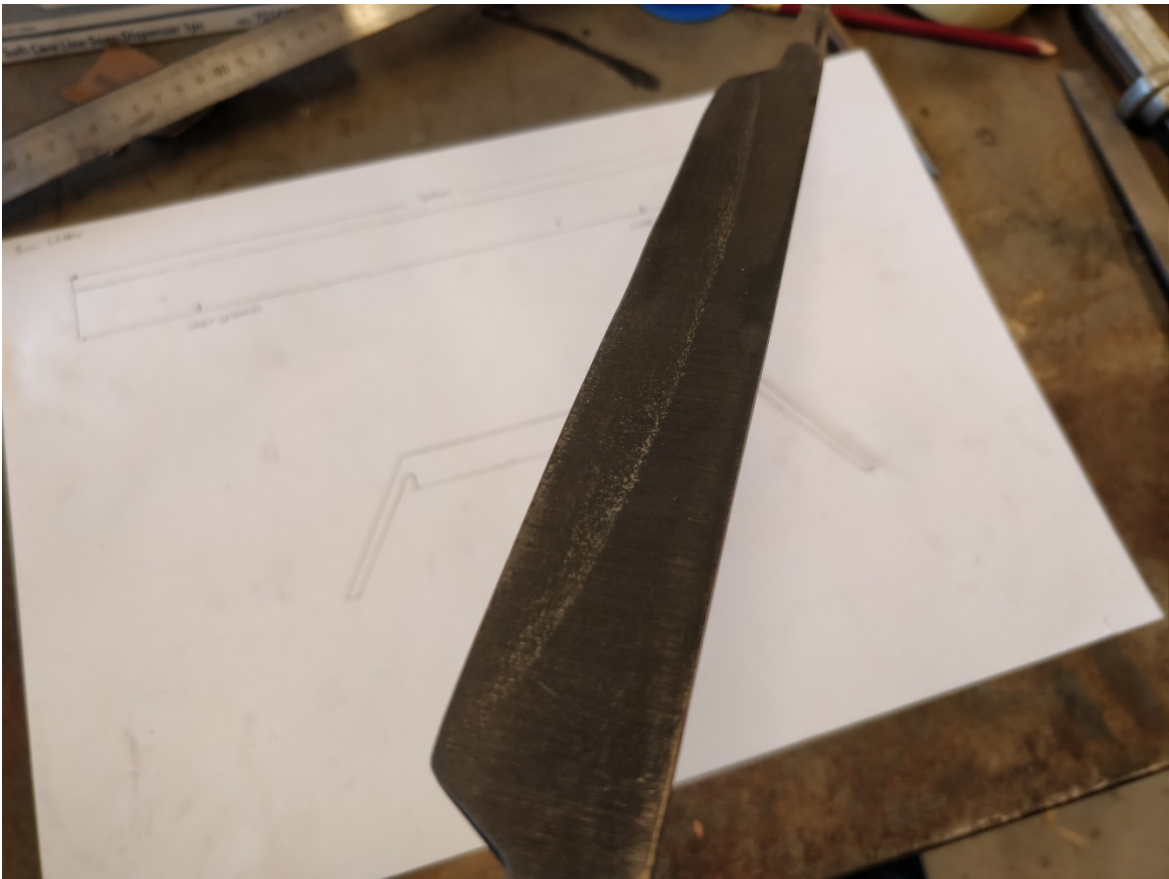

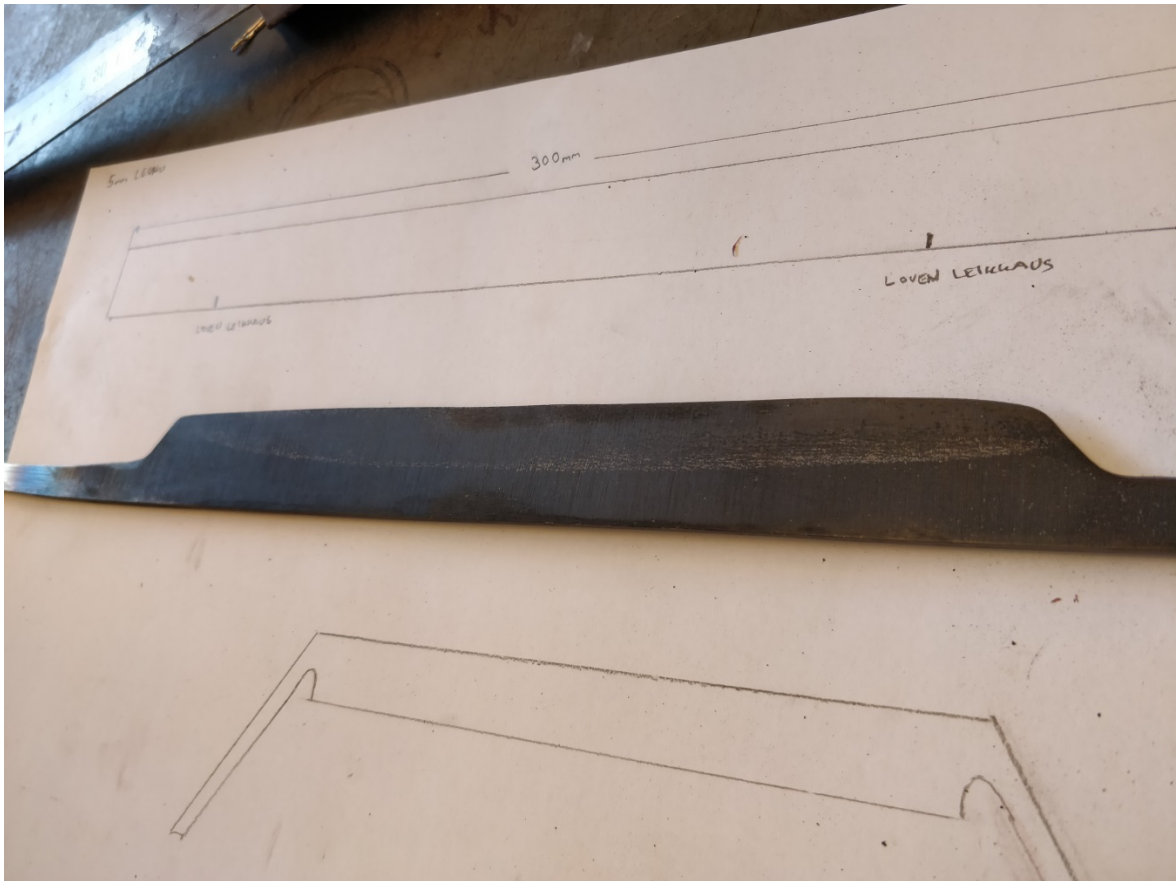

Bending blade

After normalization three times, grinding, quenching and tempering

Bending tang's by using blowtorch and metal pipe. During the heating process blade is wrapped with a wet rag.

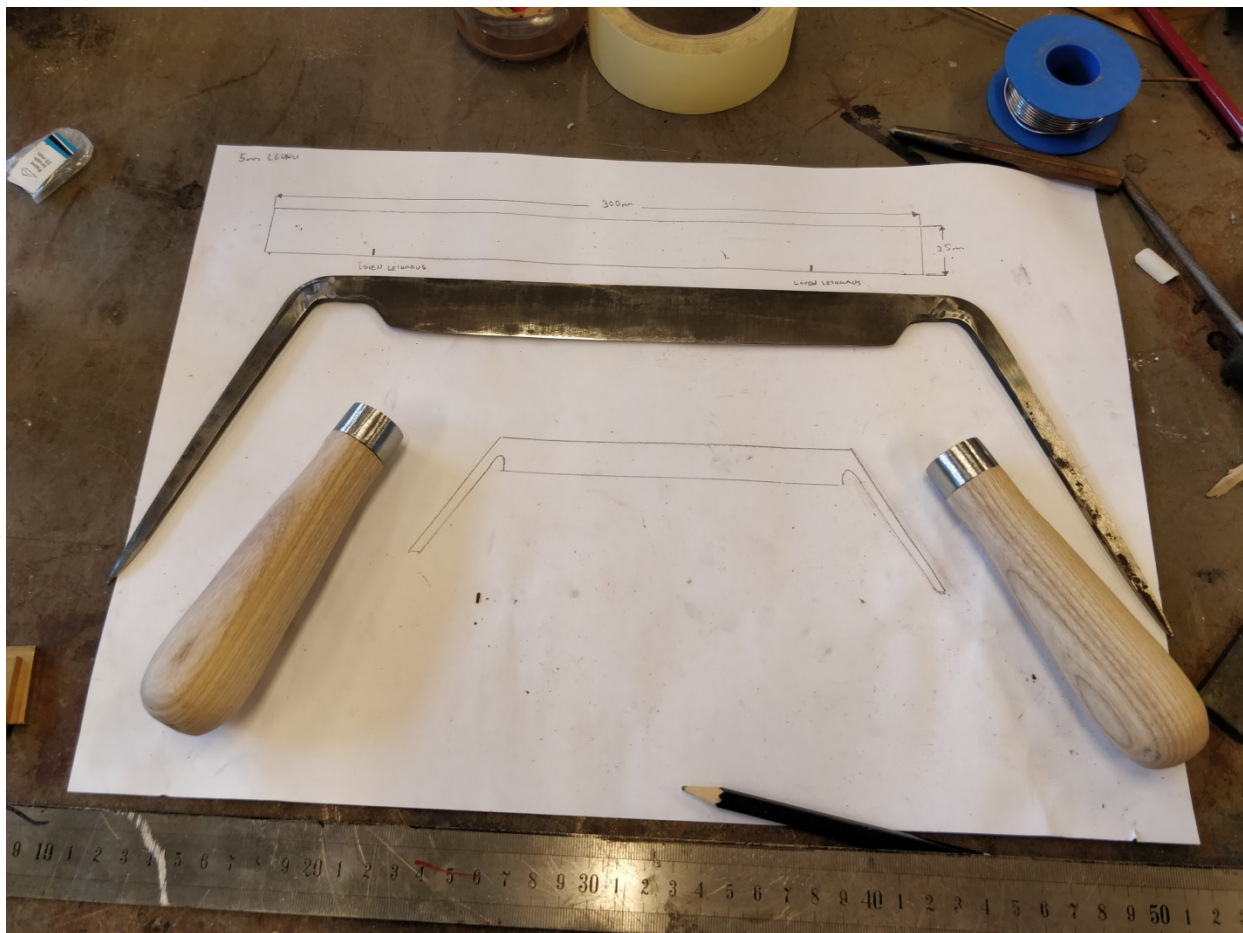

**Making grips for drawknife from elm wood, using this blade.**

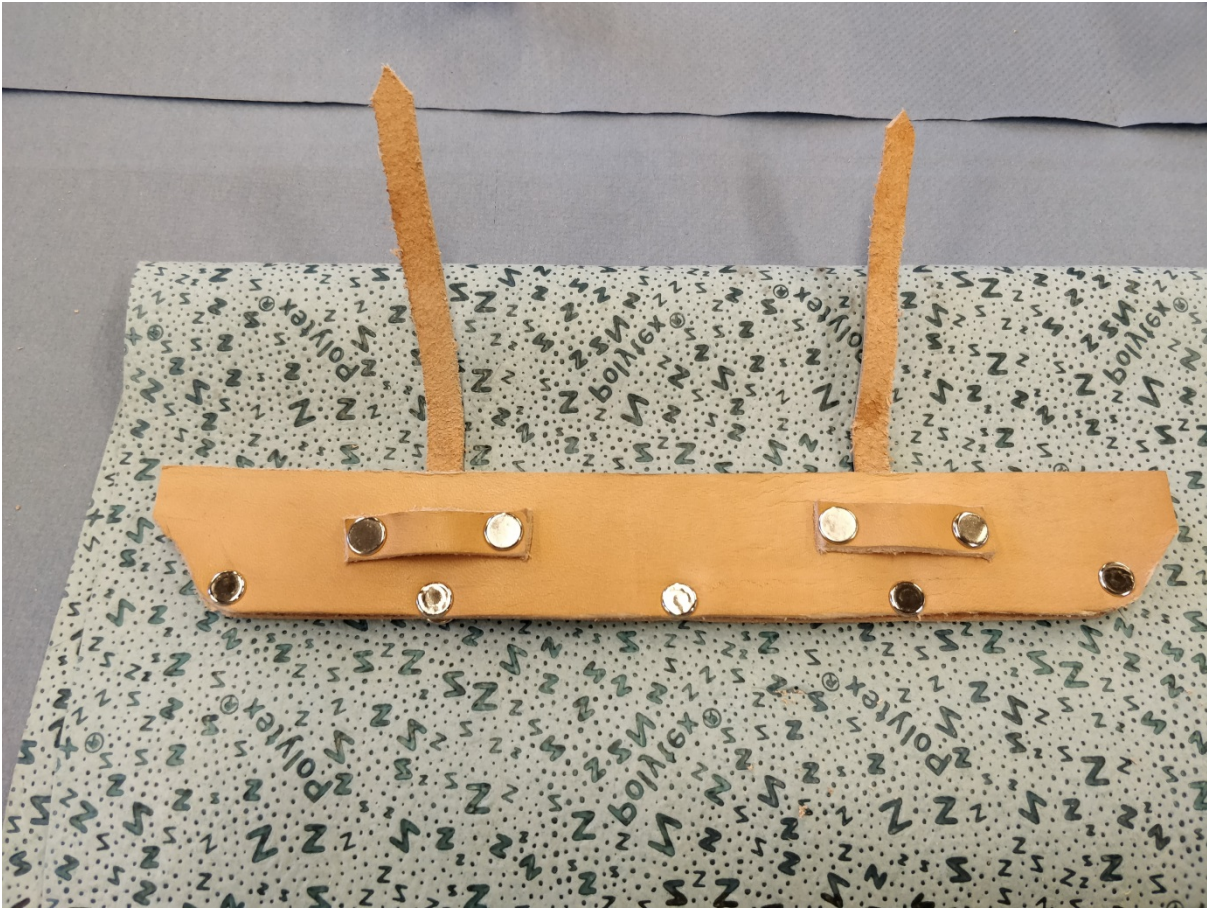

## Making a leather cover

My second drawknife
